Moses Obinna

moses.obinna@outlook.com | obinna.pxxl.run | linkedin.com/in/obinnamoses/ | github.com/ihyfka/

PROFESSIONAL SUMMARY

Motivated Computer Engineering student and Full-Stack Developer with hands-on experience building and shipping production applications using **TypeScript**, **React**, **Next.js** and **Node.js**. Comfortable across full stack environments, from relational database design and REST API architecture to performant, responsive frontend interfaces.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, CSS3
Frameworks/Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, TanStack Query, Editor.js
Databases: PostgreSQL, Supabase, Firebase
Tools/Platforms: Git, GitHub, Postman, Vercel, Cloudflare, Render, Railway

EXPERIENCE

Machine Learning Intern | FlyRank AI • Remote July 2026 – Present

- Developed practice notebooks exploring ML data pipeline concepts, applying foundational techniques in a production-adjacent environment.
- Gained exposure to production machine learning workflows, observing how engineering teams structure data pipelines and prepare datasets for model integration.
- Built working knowledge of **SEO** principles and how they intersect with AI-driven content and ranking systems.

Front End Developer | Mahmet Global Limited • Abuja, Nigeria May 2026 – Present

- **Spearheaded the development of the company's real estate website from scratch,** establishing a professional online presence for prospective clients.
- Engineered responsive, minimalist UI components ensuring visual consistency across mobile, tablet, and desktop screen sizes, resolving cross-device rendering issues.
- Optimized client-side rendering and eliminated redundant DOM elements, improving page load speeds and platform accessibility across varying network conditions.
- Collaborated directly with stakeholders to iterate on layout designs, content presentation, and navigation structure prior to launch.

PROJECTS

Velo | Blogging Platform • Personal August 2026 – September 2026

Stack: Next.js, TypeScript, Node.js, Editor.js

- Architected and deployed a minimalist, high-performance blogging platform to solve content delivery bottlenecks and improve search engine crawlability.
- Integrated Editor.js for a modular, block-style authoring experience, utilizing TanStack Query for background caching and instant client-side state synchronization.
- **Engineered a secure passwordless authentication system** utilizing HTTP-only cookies, eliminating vulnerability to client-side XSS attacks.
- Designed a custom ad delivery system and relational database schema, serving dynamic sponsored campaigns and fallback UI cards without impacting core web vitals.

EDUCATION

BACHELOR'S DEGREE in Computer Engineering • Nile University of Nigeria Sept 2024 – est. 2029

- **GPA:** 4.97/5.00
- **Relevant Coursework:** Data Structure and Algorithms, Computer Architecture and Organization
